# PRODUCTS

## **Roboguard**

A battery-operated, dual-sensor, outdoor movement detector designed to detect intruders and wirelessly transmit the information to a Roboguard Base station.

## **Portable Headquarters (HQ)**

A portable 8-zone, 4-output, base-station is used to receive and announce signals from up to 8 Roboguard Sensors. The HQ can also be wired to a siren and/or an up-line alarm panel.

## **Alarm Interface**

The Roboguard alarm interface is used to interface up to four Roboguards with individual intruder detect, tamper and status LED's.

## **Power pack**

HQ interface to external devices such as a siren and/or alarm panel. A complete solution with 7A/h battery, 16VDC transformer, tele-cable, DC power to HQ and 5 relay out-put PCB.

## **Keypad**

A 4-zone, 4-output fixed Roboguard base-station is used to interface Roboguards into an existing alarm panel. Also ideal for larger installations that require more than 8 guards.

## **Receiver**

A separate receiver that provides the data stream for the Keypad and for the repeater station.

## **Transmitter**

A Roboguard Transmitter is capable of transmitting roboguard intruder and roboguard remote alarms in response to triggering from externally connected systems.

## **LED**

The LED Driver unit is used to visually indicate the status of the Roboguard system. The status is indicated via an add on LED. LED indicates Armed, Disarmed or Alarm conditions.

## **Keyfob Transmitter**

A handheld remote transmitter is used as a panic button and remote control for radio base-stations. 4-button and 6-button versions are available.

# ROBOGUARD

## Outdoor Beams

Roboguard uses state-of-the-art equipment and technology.

The entire system is wireless and simple to install and move.

The HQ monitors for tampering with the sensors,  
as well as battery levels.

The HQ can be connected to a siren or to any existing alarm  
panel and can be armed/disarmed by remote control.

The Roboguard sensor is weather proof, tamper proof, robust  
and impervious to lightning and ultra-violet light damage.

The Roboguard sensor can be positioned up to 400 meters  
from the HQ (and up to 800 meters with a booster).

The Roboguard will detect movement up to  
20 meters away and has a detection arc of 110°.

*Roboguard interfaces easily to most alarm panels*

***Forewarned is forearmed!***

***Peace of mind,  
wherever  
you need it***

***Robust  
versatile and  
reliable***

***Temporary or  
permanent  
asset protection***
